

(Hubab Masood Chaudhary)

Use Case Text for “Submit Housing Application”:

Primary Actors: Faculty Member

Interest: faculty members are interested in securing suitable housing

Pre-conditions:

- Faculty member is logged in using special credentials.
- Housing Application period is opened.

Postconditions:

- The housing application is successfully submitted and recorded in the system
- System sends acknowledgement message to the faculty member, confirming that application has been received.

Main Success Scenario (Basic Flow):

1. Faculty member opens the “Housing Application System” Website.
2. Faculty member selects “Apply for Housing”.
3. System Displays application form.
4. Faculty member fills out the application form.
5. Faculty member selects the “Submit” button.
6. System prompts for confirmation.
7. Faculty member selects the “confirm” button.

Alternate Flow:

2a. Faculty member attempts to access the application form after deadline

System prompts message “application period has been closed”. Faculty member cannot proceed the application.

5a. Faculty member submits the application with incorrect or missing information.

The system displays an error message. Faculty member corrects and restarts the application.

Special Requirements:

- Login session should be expired after 24 hours.

Frequency of Occurrence: Could occur periodically (after every 6 months).
